DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3 and 6-25 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The Applicant's invention was drawn to a method and system for storing settings of the receiver section, e.g. the control voltage of a VCO in a PLL in a cellular phone in order to preserve energy in radio frequency receivers by switching the receiver section, e.g., amplifier, oscillator, etc. "off" position. In the prior art systems, settings of the receiver section in receivers are usually lost during power-off periods.

Dacus et al. (U.S. Pat. #: 6,223,061), cited in the first Office Action and discussed in the Interview on 12/7/2004, teaches a voltage controlled oscillator is not switched off even the cellular phone is in power-off mode (see Dacus Patent on col.9, lines 18-35 and col.10, lines 53+ and Interview summary).

New found reference, such as Nagashima (U.S. Pat. 6,532,357), Ichikawa (U.S. Pat. #: 6,532,357) and Tam et al. (U.S. Pat. #: 5,201,063) each teaches related subject matters.

Nagashima teaches power saving method and apparatus for implement in a radio base station, not in a receiver of a mobile phone.

Ichikawa teaches first and second variable power amplifiers wherein either power amplifiers are switched on and off under the control of a switch control section 25 as shown in figure 1.

Art Unit: 2643

Tam et al. teaches a setting of electronic circuits in a radio telephone that adjust power, gain, etc. to the radio telephone during initial manufacture or its servicing, and stored such settings in the radio telephone memory.

Therefore, the above references as well as and other cited prior art of record fails to clearly teach or fairly suggest a method and system for storing settings of the receiver section, e.g. the control voltage, into a capacitor during switching off of amplifier, oscillator, automatic gain control (AGC), etc. for power off periods, as substantially described and connected to all independent claims 1, 13, 15 and 20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
